

A tree instead of a map

Bootstrap consensus tree · Cosine Delta on the same 80 words.
500 replicates (words resampled with replacement); every branch shown is supported by more than half of them. Rooted on MBh 6.
Dots scale with bootstrap support; numbers are percentages.

- epic core
- late epic
- old purāṇic core
- middle purāṇic
- old Skandapurāṇa
- late sectarian/encyclopedic
- Śivapurāṇa
- Bhāgavata
- BhP with commentary
- Śāstra

The tree recovers the groups the map shows — the epics, the old purāṇic core, the Bhāgavata, the Śivapurāṇa — but it has to force them into nested boxes, so the gradual drift between them is exactly what it hides.
